jetauro@uwaterloo.ca · (519)-569-0418

TECHNICAL SKILLS

· Strong knowledge of the Android platform and development processes
· Experienced in unit testing and TDD (Test Driven Development)

Languages	· Proficiency in Java, C++, C, HTML, and CSS · Experience with Ruby on Rails, Python, Javascript, and Actionscript
Operating Systems	Mac OS X, Linux (Ubuntu), Windows 8/7/XP/Vista
Tools and Software	Sublime Text, Visual Studio, Android Studio, GitHub, Eclipse, Pivotal Tracker

TRANSFERABLE SKILLS

· Excellent understanding of programming principles and their applications
· Skilled in the management of projects from conception to implementation
· Solid ability to review and execute instructions and criticisms with understanding and accuracy
· Outstanding written and verbal communication, teamwork, and problem-solving skills

PROJECTS

LiveFit
Technologies: SQLite Databases, Java, Android Studio, Dependency Injection Libraries

An Android application that allows users to create workouts and exercises and to add them to a work out schedule. It can also guide users during each step of their workout.

SectionedListRecyclerView
Technologies: Java Generics, Android Studio

An Android library that allows for a RecyclerView Adapter to contain a list of multiple types of items with different layouts for each type.

Soccer Management App
Technologies: Ruby on Rails, Bootstrap

A simple Ruby on Rails application that allows a user to "register" a soccer team, schedule games in a soccer league, and to update and view game results.

WORK EXPERIENCE

Bridgit
Android Developer
Waterloo, ON
September – December 2014

· Created and developed an entire full-stack redesign for the company's application, Closeout, using agile methodologies with a small team
· Learned to quickly understand and implement various Android libraries using gradle to build

Pivotal Labs
Agile Engineer
Toronto, ON
January – April 2014

· Developed android applications to be released to market
· Debugged and provided support for release candidate applications
· Practiced pair programming and test driven development using the framework Robolectric

Xtreme Labs
Agile Test Engineer
Toronto, ON
May – September 2013

· Extensively tested functionalities of various mobile applications on several operating systems (iOS, Android, BB10, and Windows 8)
· Discovered significant bugs in applications and documented with pivotal tracker
